Projects

Power Usage Outage Prediction Using AI | *Python, Streamlit, Gemini API* Feb 2025 – March 2025

- Built a data-driven forecasting model leveraging historical power usage and meteorological datasets to predict urban power outages.
- Implemented machine learning evaluation pipelines using Pandas and NumPy to analyse patterns, significantly improving outage forecasting accuracy.
- Visualized data trends and prediction reliability using Matplotlib and Seaborn for stakeholder reporting.

Space Exploration Bot: AI for Space Exploration System Jan 2025

- Constructed an interactive web-based chatbot that provides real-time space insights and astronomy data through NASA and Open Notify APIs.
- Integrated Google's Gemini API, processing 750+ API calls to generate intelligent natural-language responses from NASA and Open Notify APIs, enhancing the Space Exploration Bot's ability to deliver real-time space insights.
- Tech: Python, Stream lit, Gemini API, NASA API, Open Notify API, REST

University Cricket Event Manager. Dec 2024

- Built a responsive web application to manage university-level cricket events, allowing users to view schedules and match details seamlessly.
- Designed a modern landing page to enhance user engagement and navigation experience. Utilized Swift and JavaScript for interactive UI components while implementing core backend logic and functionalities using C++.

Certificates

- Data Structures & Algorithms (Basic to Brilliance): Lovely Professional University. Aug 2025
- Python Intermediate: HackerRank.

Achievements

- **Runner-up, National Cricket Sports Player 2024**:

  Represented team at national level.
